

D-Chem™ ColorPAC DL Paper processing kit

D-Chem ColorPac DL Paper Processing Kit 30DE3141

The D-Chem ColorPac DL Processing kit is a high quality digital chemistry specifically made for use in the Agfa D-Lab.1, D-lab.2 or D-lab.2+ or similar.

The formulation of this kit is fine tuned for use in these types of minilabs. The CPAC D-Chem chemistry will produce deep blacks, pure whites and vibrant reds, needed to enhance digital prints. With the ultra-low replenishment rates you will achieve excellent waste control in your lab.

Each D-Chem ColorPac kit contains 2 cartridges that will process 110m² of color paper per cartridge. The cartridges consist of 4 bottles that will contain a one-part Developer concentrate P1 (Blue cap), the P2A (Light Red cap) & P2B (Dark Red cap) Bleach-fix concentrate and the P3 (Yellow Cap) Print Rinse concentrate.
