Trecom MONO Part RA Bleach-Fix & Replenisher

A standard One-part bleach-fix for any RA-4 process that can be used as a replenisher or tank solution. It is formulated to resist sulfurization and easily recover the available silver using cartridges or electrolytic equipment. With this one-part bleach-fix, no more mixing errors can be made and creates less packaging waste and shipping weight.

Trecom RA Mono Super Stabilizer & Replenisher

A newly formulated One-part paper stabilizer for the waterless process that enhances dye stability, produces whiter whites, and resists biological growth. This solution also enhances the archival quality of the finished product by complexing any excess bleach-fix remaining in the paper, and removing the residual soluble silver from the paper. The one-part formulation reduces the packaging waste by 50% and the chance of mix errors by the end-user are reduced as well. Trecom RA Mono Superstabilizer can also be used in large paper processors such as Agfa VSP or in roller transport machines to eliminate the wash step.
